“This payroll system is so much more efficient, saving hours in a payroll week. The ability to drill down through screens, to see what you're looking for, to change things as you go, and to go back to where you started with virtually a couple of clicks of the mouse is phenomenal. Reporting and exporting into different formats, such as Excel, gives the finance department flexibility in how the reports look and feel. They can be tailored to your management's preference.” -Montpelier, OH
